

THOMASTON PUBLIC SCHOOLS
Thomaston, Connecticut

Pesticide Management Policy

Date _____

The intent of this policy is to ensure that students, employees, and parents/guardians receive adequate notice, in conformity with applicable statutes, prior to pesticide application in school buildings and on school grounds.

The Thomaston Public Schools will:

- Provide notice of planned pesticide application to students, parents/guardians, and employees in the manner required by law and establish a registry of parents/guardians and staff who want to receive such advance notice.
- Post the areas scheduled to receive pesticide application(s).
- Maintain written records for five years of all pesticide applications.
- Provide continuing instruction to those students who, based upon written medical request, find it necessary to be absent during the period of application.
- Inform parents/guardians and staff of the pesticide management policy.
- Employ only licensed and certified pesticide applicators for any non-emergency pesticide use in school buildings or on school grounds.

During the past school year, the following pesticides were used or applied at the (insert school name]:

[insert list]

Please return the form below if you wish to be notified in advance of any planned application of pesticides at your school or on your school grounds.

[insert return address]

Please add my name to the pesticide notification registry.
