Thomaston Public Schools Announces

Fire Prevention Program at Black Rock School

(Thomaston, CT)— Principal Jonathan Kozlak announces Fire Prevention Program at Black Rock School. This program was held on October 11, 2017 for all students. “This program teaches our students about fire prevention, as well as fire safety strategies. Additionally, the children get to meet our firefighters and learn about the equipment used by our fire department”, noted Principal Kozlak.

The program included a presentation about fire prevention in the gymnasium and a hands-on outdoor experience, where students explored fire trucks and related equipment used by first responders. Principal Kozlak stated “I would like to thank the Thomaston Fire Department and Fire Marshal Bob Norton for giving their time, effort, and expertise to our school. Not only did the children learn, but they met and interacted with our firefighters, who serve as role models in their service.
